SMART FARMING SOLUTIONS

SPREADING AND FERTILIZATION

VITI

SETO

ARBO

HORTI

FRT

Mounted precision spreader from 600L to 1000L. Suitable spreading on surface or underground of **chemical, granulated, powdery and pellets fertilisers.**

Sieve to avoid agglomerates and foreign objects.

Simple and precise regulation of the amount of fertilizer

3 MODELS

Double action independent hydraulic opening.

Critical components made in stainless steel to ensure durability.

Lubricated gear box in oil bath.

DEF

Trailer for mineral fertilizer. Spreader for mineral fertilizer of 2.5 or 5 m3. Suitable for a surface or localized underground distribution of **pellets and granulated.**

Conveyor belt with roller guidance.

Lights signaling bar.

Automatic rear height-adjustable door with automatic closing when the transfer belt stops moving.

2 MODELS

Turning draw bar (allows turns up to 90°).

Rear accessory holder.

Hydraulic adjustment of working depth and transport height.

Working depth adjustment screw.

Hydraulic and parking brake.

ECOFEED

Multifunctional trailed fertilizer. Multifunctional spreader for **organic solid fertilizers (manure)** from 2.5 to 13 m3. Availability of multiplies accessories for localised and surface applications.

Automatic rear height-adjustable door with automatic closing when the transmission chain movement stops.

Availability of normal (trapezoidal) or rounded hopper.

7 MODELS

Torque limiter in the hydraulic system against drive chain's overstress.

Turning draw bar (allows turns up to 90°).

Hydraulic and parking brake.

Working depth adjustment screw.

Rear accessories holder.

Hydraulic adjustment of working depth and transport height.

Hydraulic speed regulation of the chain (normal and inverted gear).

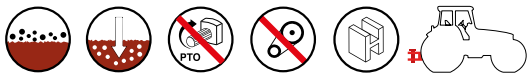

DEA

Over-the-row spreader for manure application. Its high axle between the wheels allows to work on crops up to 87 cm high, such as V shape vineyards, sugar cane and all crops using a over-the-row tractor.

Torque limiter in the hydraulic system against drive chain's overstress.

5 MODELS

Hydraulic speed regulation of the chain (normal and inverted gear).

Special anti-wear distribution chain.

Heavy duty frame and robotic welding.

Height adjustable front support foot.

Double subsoiler with hydraulic extension.

Hydraulic adjustment of working depth and transport height.

SURFEED

Spreaders for organic solid fertilizers (manure). It reaches 15 mt when equipped with spreader disc.

Torque limiter in the hydraulic system against drive chain's overstress.

Automatic rear height-adjustable door with automatic closing when the transmission chain movement stops.

Availability of normal (trapezoidal) or rounded hopper.

7 MODELS

Turning draw bar (allows turns up to 90°) Fix drawbar as option.

Heavy duty frame and robotic welding.

Special anti-wear distribution chain.

Rear accessories holder.

Hydraulic and parking brake.

PROFEED

Professional spreader for organic solid fertilizers (manure). It fits external chains avoiding contact with manure. The machine spread up to 15m.

Wide automatic slurry gate with double cylinders height adjustable with automatic closing when inside chains stop moving.

Tank for chain lubrication.

3 MODELS

Hydraulic speed regulation of the chain (normal and inverted gear).

Draw-bar with fixed bar ring joint.

Ø1500mm spreading disc.

Hydraulic and parking brake.

High reinforced chains made by special anti-wear steel and located outside the hopper.

Double engine on chain.

ACCESORIES AND OPTIONS FOR FRT

Subsoiler Kit

LED lights kit

Double sonar for automatic plant detection

PVC cover

Extra hopper kit

Cover furrows

ACCESORIES AND OPTIONS FOR TRAILERS

Simple subsoiler

Double subsoiler

Double subsoiler with chains

Subsoiler with unloading band

Cover furrows

Side unloading belt

Double lateral belt two falls

Ø700 Disc adaptable

Sonar

ERI

The **Automatic Coupling** allows the fast connection and disconnection trailer tractor. Ideal for tractors equipped with front loader; Economy and Agility are ensured by loading the hopper using an only tractor.

WHY CHOOSE OUR EQUIPMENT?

Versatility

- Simple and versatile equipment for fertilization in vineyards, orchards and open fields.
- The widest range of equipment in the market for compost or inorganic fertilizers spreading onto vineyard, fruit trees and open fields.
- Different accessories that allow to distribute the fertilizer according to the crops needs.

Exclusivity

- A machine for 3 types of application: surfacely, localizely and subsoiling.
- The first and unique fertilizer spreader with 'automatic coupling system' (Option) to connect and disconnect the machine from the tractor cab in 4 seconds.
- Roller chain and special anti-wear steel for professional use to get high performances.
- Modular construction system of the hopper. Allows substitutions of hopper sections in the event of breaks or dents. Serie PROFEED.

Effectiveness

- Low -power absorption and great maneuverability thanks to the elimination of PTO shaft.
- Magnificent work with any type of organic fertilizer. Magnificent crumbled and excellent cast.
- Constant and uniform dispensing independent from RPM or tractor's speed.

Serie FRT

- Time is valuable, it is possible to work up to 20 km/h with standard soil conditions by equipping electronic dosing system.
- Performance up to 260 kg / min.
- Speed of the discs up to 720 rpm.
- Its exclusive design allows to reach working widths from 1.6 to 18m.

Reliability

- Components and materials of high quality.
- Low maintenance requested (no lubrication needed into essential parts).
- Manufacturing experience since 1973.

Serie FRT

- The plates, vanes, agitators, carter and the discs are made of stainless steel to guarantee its resistance and durability.
- Stainless steel outlets easily removable for cleaning and maintenance.
- Double hydraulic opening by a double acting cylinder.

Safety

- The electronic dosing system maintains constant application rate at different speed to optimize fertilizer quantity.
- Controlled release fertilizers can be used thanks to the adjustable double subsoiler, an effective solution for sustainable agriculture.
- The most consistent and sustainable option in the medium-long term for organic farming is the enhancement of soil properties and the use of composted fertilizers. These are the richest in carbon, slow release and humus precursors.
- Increase the organic matter level and, consequently, the biological activity means improving soil production capacity and resiliency.

Sustainability

- The discs and spreader vanes are adjustable with high accuracy.
- All models are designed for simple and intuitives operations.
- Fully hydraulic operation in all its functions.

Serie FRT

- The regulation of the opening of the hopper is composed of two independent indicators placed on a graduated scale, simple and visible.

SUSTAINABILITY

Our commitments

Respect and honesty are fundamental rules of ID David when dealing with customers, employees, suppliers and our planet. The company currently develops and promotes corporate social responsibility.

We believe in creating shared and lasting values with all *stakeholders*.

100% renewable power consumed in 2020

Our aim is to achieve **0%** CO2 emissions by 2025 through reforestation

100% electric vehicles for internal mobility

99% recycling of the generated waste
